The intricacies of power technologies in organizational processes by Attila Bruni*, Francesco Lia Tirabeni****

Abstract

The relationship between power, a theme in organization studies, typically pessimistic and an optimistic one. Both which technology “impacts” society and often ambiguous dynamics that surround Special Issue focuses on the intricate organizational processes. Presenting the Special Issue, we suggest five themes approaching these intricacies: 1) digital organizational structure and processes; 2) and workers’ participation; 3) digital renegotiation; 4) digital technologies, the joint design of technology, work, and a critical lens to approach technology, work and a critical lens to approach technology, work and a critical lens to approach technology, work and a critical lens to approach technology, work. The present article is the result of a total however, for academic reasons individ Bruni wrote the Introduction and paragraph 4; and 1 Conclusions were written jointly by the papers help overcoming simplifications relationship between power, digital technology, management, work practices.

Keywords: power, digital technology, management, work practices
